Oh that kind of satellite, thanks! The answer is definitely "NO."

Mr. Grant,

I haven't thoroughly reviewed your attachments yet but a short answer to my second question whether or not there is a satellite point of communication present is "No". Am I correct?

Ben Ghaffari

Mr. Ghaffari,

I submitted 3 attachments on the web application yesterday evening including a copy of the FAA Operating Limitations, a Point of Contact information document, and a copy of the letter sent to the FAA requesting an NGT

3/24/2009

number.

It wasn't clear from the web module whether the attachments went through and it's possible that some may have been sent twice. Please let me know if you have received these and if there is additional information you need from me. I will let you know when I hear back from the FAA.

Best regards,

Adam Grant

Applicant: L-3 BAI Aerosystems
File Number: 0108-EX-PL-2009
Correspondence Reference Number: 8175
Date of Original Email: 03/19/2009

Mr. Grant, 1. Please submit the application fee. 2. Is there a satellite point of communication with respect to your testing? If yes, please provide the name and longitude. 3. Please prior coordinate the use of the frequency band 1370-1390 MHz with the Eastern Region (AEA) FAA Regional Office. Please obtain the NGT number from the FAA Regional Office at the completion of the coordination and report it in your response to this correspondence. Please report the parameter below in your coordination with the FAA Regional Office: - Peak envelope power

3/24/2009

(PEP); - Type of antenna; - Transmit antenna gain; - Elevation above sea level of the antenna site; - Height above ground of the focal point of the antenna; - Antenna polarization; - The azimuth that the antenna is pointed or appropriate designator to indicate whether the antenna is rotating, non-directional, etc.; - Pulse repetition rate (PRR) that the equipment is capable of operating on to include PRR stagger sequences if appropriate, whether the PRR is adjustable and what PRR's the equipment can accept, and any other information that would be helpful in understanding the pulse characteristics of the equipment; - Pulse width; - Equipment nomenclatures; - Whether the equipment is capable of blanking transmissions in certain azimuths and any limitations with respect to blanking; - Radius of operations if appropriate; - Detailed description of the proposed operation to include any technical parameters that will be altered during operations.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of 03/19/2009 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
