

We will be providing a communication system for a new class of US Coast Guard (Dept of Homeland Security) ships and have a requirement to test radios and antennas by broadcasting live over the air. We have approximately 12 radios to test using antennas mounted on top of our building in Camden, NJ. Antennas will be mounted at two ends of the building and we will attenuate the power to transmit at low levels, which will all be below 1 watt. The USCG Contract Number is HSCG23-14-C-APC003.
