

Reference: GPS Re-radiator application (FCC 442)

Confirmation Number: EL812049

Form 442 File Number: 0063-EX-PL-2009

Question 7

Will be utilized to verify GPS data for aircraft communications and navigation systems while hangared.

Aircraft are under upgrade and/or modification and normally on jacks during major overhaul. This will eliminate the need to have to re-install landing gear, remove scaffolding, tow aircraft from hangar to verify these systems which would lead to production delivery delays. Using re-radiators will allow both functions to occur simultaneously reducing cost and delivery times. Aircraft in question are used for US anti-drug operations.
