Subject: [EXT] L3 Request for Consent to Experimental Operation on Frequency 1576.875 MHz - Leidos Innovations Corporation

Ms. Curtis:

On behalf of Leidos Innovations Corporation (Leidos), and expressly subject to the conditions below, this is to confirm that Leidos has no objection to L3's proposed operations on the frequency 1576.875 MHz as proposed in File No. 0406-EX-CN-2018. To close this matter, please provide the requested information and/or confirm the items below:

- Leidos' consent is limited to the operations as proposed in File No. 0406-EX-CN-2018, and only for the period specified in your request, namely 11/1/2018 – 10/31/2020. Any further operations on the frequency 1576.875 MHz beyond that timeframe are subject to Leidos' further review and evaluation.
- L3 is subject to immediate cessation of operations in the event Leidos experiences interference related to L3's operations, or other concerns arise. In that regard, please provide the name(s), email address(es) and wireless number(s) for the "Stop Buzzer(s)" for the experiment, who have the ability to promptly terminate operations on the subject frequency.
- Leidos' consent is separate from any additional review/coordination/restrictions that may be imposed by FAA or other stakeholders with respect to the proposed operations.

Please provide your confirmation of the above items, and your provision of the Stop Buzzer information, at your earliest convenience in order to close this matter.

If you have any questions, please feel to contact me directly.

Sincerely,

Jeff Rummel
Attorney for Leidos Innovations Corporation

To: Kennell, Jim S. [US-US] <JAMES.S.KENNEL@leidos.com>
Cc: Kara.R.Curtis@L3T.com
Subject: EXTERNAL: Requesting frequency coordination from Leidos Innovations Corporation

Mr. James S. Kennell,

L3 Technologies is requesting an experimental frequency authorization from the FCC using 1576.875 MHz in Greenville TX. Before the FCC will grant the authorization a written consent must be obtained from Leidos Innovations Corporation. I've attached the FCC Form 422 with all the technical parameters. The license will support a Government contract testing the response of a specific aircraft receiver on selected frequencies. L3 would like to start testing 1 November, 2018 and would be completed no later than 31 October, 2020.

Unfortunately, due to the FCC timeline I need to have a favorable or unfavorable response by 3 October, 2018.

If you have any questions or need more details, please let me know.

Thanks again for your assistance,

Kara R Curtis
