Special Conditions:

- (1) The station identification requirements of Section 5.115 of the Commission's Rules are waived.
- (2) GPS re-radiators are limited to a maximum ERP value that will result in power levels not to exceed a power spectral density of -140 dBm/24 MHz measured at a distance of 100 ft outside the building of operation. Any malfunction, misalignment, or tampering of the equipment or its location which results in an increased power spectral density outside the building could cause harmful radio frequency interference to GPS receivers, including those in aircraft and/or ground based facilities.
- (3) This authorization is issued for the express purpose of conducting experimental operations described in the related application and required by U.S. Special Operations Command contract number USZA22-00-D-0007, U.S. Marine Corps. Systems Command contract numbers M67854-05-D-7015 and M67854-06-A-7001 and CECOM Acquisition Center contract number W15P7T-06-F-0017. The use of this radio station in any other manner or for any other purpose will constitute a violation of the privileges herein authorized. Except as subsequently authorized by the Commission, this radio station shall not be operated after the expiration date of the contracts designated in the related application and enumerated above.

Special Conditions:

- (4) Licensee has submitted calculations that predict that the installation will be at or below the limit specified in NTIA manual section 8.3.28 condition 6.
- (5) Stop buzzer is Tim Kemnitz (585)694-7901 or Jim Lill (585)233-5781.
- (6) Area of potential interference to GPS reception is under the control of licensee.
- (7) Licensee must post a sign on doors to the testing area stating GPS re-radiator in use and GPS information may be impacted for periods of time.
- (8) Operation is for indoor use only.
