Subject: FCC File No. 0685-EX-ST-2014

Message:

I have performed the AM allocation study for the experimental license request (File No. 0685-EX-ST-2014). I have updated the filing with the non-interfering frequencies to be used for the experimental testing of the 250 Watt ERP radiator. The chosen frequencies meet FCC requirements for interference protection.

Respectfully,
Chris Horne
