Washington, D.C. 20005

RE: Leo One USA., L.P.
File No. 3981, 3982 & 3983-EX-PL-93
Filed October 22, 1993

Dear Mr. Mazer:

As part of a review of its operating procedures and in preparation for a more automated licensing system, the Experimental Licensing Branch is attempting to clear what appear to be outstanding applications from its experimental licensing database. In some instances, information is available indicating that an application (FCC Form 442 or 405) was filed, but no record is shown that a license was actually granted.

The above referenced applications appear to have been pending for a considerable period. If your client still wishes to pursue it, please submit a new FCC Form 442's with any pertinent supporting papers, along with proof of filing fee payment, directly to the following address:

Office of Engineering and Technology
Experimental Licensing Branch, MS 1300E1
2000 M Street, N.W., Suite 230
Washington, D.C. 20554.

Please direct all responses to the attention of Ms. Peggy Fowler.

If we do not receive the requested material within 30 days, we will assume that your client does not wish to pursue the application, and

our records will be updated to indicate that the application has been dismissed without prejudice in accordance with Section 5.60(b) of the Commission's Rules.

We apologize for any inconvenience that this apparent delay in application processing may have caused.

Sincerely,

A handwritten signature in cursive script that reads "Paul L. Marrangoni".

Paul L. Marrangoni
Chief, Experimental Licensing Branch

Enclosure: FCC Form 442
