Re: Request for Expedited Processing of Experimental STA filed on 9/19/11 for LGS Innovations

LGS Innovations is requesting expedited processing of their Experimental STA filed on 9/19/11 for the reasons below.

This effort supports testing of a tactical, deployable WiMAX system to support United States Army operations in Iraq and Afghanistan. There is no commercial application for this system. The time critical nature of this specific test is driven by DoD mission requirements impacting safety of life. The testing, sponsored by the United States Army, is scheduled to begin on October 3 and be completed by November 19, 2011.
