Re FCC 422 application for STA

Dear Sirs,

We are seeking a special temporary authority (STA) from the FCC to be able to support demonstrations of our "EdgeCentrix" 4G LTE deployable communications systems with the US Navy, US Army, Government Research labs, Public Safety organizations and other government organizations throughout the United States.

As such we need to be able to support demonstrations where 4G LTE devices (handsets and modems) are able use 4G LTE signals from our EdgeCentrix systems to prove its performance and interoperability with existing communications systems. These demonstrations are held throughout the year and across the USA at different locations.

This STA is a request to support the US Army at Ft Dix and Ft Huachuca at events in April and June 2014. These events are in place to support the evaluation of competing systems for a WIN-T RFP at the end of 2014 and an inter services exercise at Ft Huachuca - Enterprise Challenge
