---

Message:

Depending on the location, the UAS will be flown under either FAA certificates of authorization (COAs), or Code 107 waivers.

In remote locations, such as the NM test site, the UAS will be flown within line of sight range (~3000-5000ft), under COAs.

In other locations, the UAS will be flown up to 400ft., where permitted under Code 107 waivers.

Flights at the CO and NV sites, may be limited to Code 107 waivers, subject to local FAA guidelines.
