

Exhibit I

The proposed system is to use Aydn Vector radio equipment to transmit telemetry signals during the test and development of a new munitions delivery system called, Wind Corrected Munitions Dispenser or WCMD. This program is being conducted under a USAF contract F08626-95-C-0101 and is scheduled to begin on or about December 15th, 1995. The tests are to be conducted at numerous facilities and test ranges located in the U.S. and the schedule has not been established at this time as to when and where these tests are to take place.
