

Exhibit B

Program Description

The license is to allow the Datalink in the Sniper Targeting Pod to be tested in flight at LM-Aero Fort Worth. Testing of the Sniper Targeting Pod would include datalink of video from the pod to a ROVER ground station. If the datalink is tested at LM-Aero FW any issues found could be corrected before the capability is delivered in-country to the UAE.

Maximum Aircraft Altitude while operational will be: 1524 m
