Washington, DC

Attn: Experimental License Branch
Re: Modification of existing authorization
Call Sign: KE2XZF

You will find attached the electronically filed FCC Form 442, Application for Modification of an Experimental Authorization, call sign KE2XZF. This request is to add a new site to the existing station authorization. The new site has been prior coordinated with the NY Regional Offices of the FAA. The new site location is located at Ft. Drum, Jefferson County, NY. This site location was omitted from the latest modification request and operations are scheduled to begin on or about March 25th 2004.

All technical standards and parameters for the operating systems remain the same as previously licensed. We are requesting the addition of two new contract numbers to this authorization they are for Swiss - 4500'306'888 & Australia - 093MOC054. If you have any questions regarding the technical operations being applied for, please contact Brian Budwey on 315-456-2051.

Very Truly Yours,

Claude E. Wells
