Experimental License Branch
Re: Modification of Existing Experimental Authorization
Call Sign: WC2XRF

You will please find enclosed one completed FCC Form 442, Application for the Modification of Experimental Radio Station Authorization, Under Part 5, with the required FCC Form 159 and FCC regulatory fee, **\$50.00**, attached. This request is to add a new location to the area of operation of the existing authorization, **WC2XRF**.

There are no technical changes to the system, as it will operate under the same technical parameters previously approved in November 2001. If you have any problems or questions relating to the technical aspects of this application, please feel free to call **Bob Werta on (407) 356-0743** or email him on robert.e.werta@lmco.com. All other questions, please call the undersigned on **(410) 682-2156**.

Very Truly Yours,

Claude E. Wells

Tech. Support Analyst

Exhibit #1

- The purpose of the amendment is to support evaluation of the TRACER Radar system at Ft. Carson during the first two weeks of June. The TRACER system evaluation activity is being sponsored by our Army customer and is a contract requirement. The Radar will be mounted on a truck and driven to several locations on Ft. Carson to observe various exercises and activities. The Radar antenna will be located approximately 8 feet above local terrain altitude.
