Re: New/Renewal of Radio Station KO2XBQ

You will please find enclosed one completed copy of the FCC Form 442, Application for New Radio Station Under Part 5 of FCC Rules – Experimental Radio Service (Other than Broadcast), with the required FCC Form 159 and FCC processing fee, **\$50.00**, attached. This request is for a new authorization to operate on the requested frequencies at our remote test facilities located near **Bithlo, Orange County, FL**.

This request, even though it is for a new authorization, is to actually reinstate an authorization that inadvertently was allowed expired in 1999. The original call sign, **KO2XBQ**, which has been in operation from 1983 to the present time. I have attached the original filing materials for your review, a copy of the expired radio station authorization and a copy of a partial grant letter issued in 1998. According to your database the data is still on file and Frank Wright advises NTIA records are still active for this site for coordination purposes. There have been no changes in the overall operations of this site and has been operating in accordance to the last authorization granted and the partial grant letter issued in 1998.

If you should have any problems or questions, regarding this application, please feel free to call the undersigned on **(410) 682-2156**.

Very Truly Yours,

Claude E. Wells
