Re: Modification of Existing Radio Station Authorization
Call Sign: KE2XZF File Number: 0267-EX-RR-2000

You will please find enclosed a completed copy of FCC Form 442, Application for Modification of Radio Station Authorization Under Part 5 of FCC Rules – Experimental Radio Service other than Broadcast, with the required completed FCC Form 159 and FCC license processing fees, **\$50.00**, attached. This request is to modify our existing radio station authorization **KE2XZF** to include “L-Band” frequencies previously omitted, due to lack of FAA coordination. We have contacted the NY region office and they have advised we can utilized the frequencies on the attached list at our facilities near **Syracuse, Onondaga County, NY**.

However, they advised us they do not provide a coordination number for reference. And that the FAA in Washington would need to call them to verify the clearance of these frequencies for operations. If you have any questions regarding this information, please contact Jeff Luben at (315) 456-3394 or Brian Budwey at (315) 456-2051. All other questions can be directed to the undersigned on (410) 682-2156.

Very Truly Yours,

Claude E. Wells
