Attn: Experimental License Branch
Re: New Authorization for Block 60 F-16 Aircraft

You will find attachments with the submitted FCC Form 442 for a new Experimental Radio Station Authorization for our Block F-16 Aircraft. We are filing this application through the FCC as this contract has been given Department of State approval to be a commercial contract with the United Arab Emirates. Please be advised even as this is a commercial contract it does have the support of FMS in the licensing process for requested frequencies.

I have also attached a copy of the DD1494 prepared prior to the decision of FMS to support, but not have direct approval of the required frequencies to support this contract. If you have any questions please feel free to call Edwin Dedy on (817) 762-1116.

Very Truly Yours,

Claude E. Wells
