Re: 0043-EX-PL-2004 Call Sign: WD2XIV

This letter is in response to recent inquiries for clarification of information on the pending application and several technical and administrative items. I have attached to the information regarding the required emission designators for the requested UHF/VHF channels. And a correction to the area of operations being requested for these systems.

You will please find attached the chart reflecting requested emission designators for the requested frequencies, this is also one of our original exhibits submitted with 0043-EX-PL-2004. We have also contacted AFTRCC regarding the concerns over the several frequencies contained in the requested bands and have requested an expedite of any coordination needed for the affected frequencies. We are also requesting the correction to the area of operations on the application. There is a need to include both **AZ** and **AR** to the area of operations for these systems.

You will also find another exhibit being attached. This exhibit is a Department of the Air Force document granting Radio Frequency Authorization for use of various frequencies for this program in the allocated government frequencies in these bands.

Very Truly Yours,

Claude E. Wells
