Attn: Experimental License Branch

Re: Experimental License Office

You will please find attached one completed copy of the electronic application, FCC Form 442, for a new Experimental Radio Station Authorization. This request is being filed to run in conjunction with several authorizations filed for a special contract for F-16's being built for the United Arab Emirates. This contract has been approved by the State Department under contract number DP-A3994P6631. This contract is acknowledged and is indirectly supported by FMS.

I have also included copies of the DD-1494 that was completed by the program personnel prior to an FMS decision to not directly support the program because of the nature and sensitivity of the contract. This form is included to provide additional details to the request. If you have any technical questions regarding this application please feel free to contact Eric Roblin on (817) 655-7091 or by email at eric.roblin@lmco.com . All other questions regarding this application can be directed to the undersigned.

Very Truly Yours,

Claude E. Wells
