

Exhibit A

Requested is a modification of license WE2XYZ that is currently valid until April 01, 2011.

The following operating azimuth change is requested for TPSX(A) through TPSX(D) experimental radar equipment:

WE2XYZ Station location	Current Allowable Azimuth A	Current Allowable Azimuth B	Proposed Allowable Azimuth A	Proposed Allowable Azimuth B
(3) South Syracuse NL 42-55-37; WL 75-55-27 : 354 m; 1161.4 ft	115 - 170 degrees	195 -210 degrees	80-170 degrees	remove 195-210

Prior FAA coordination was established for this change under NGT09037. This NGT includes operating direction and frequency restrictions below applied only to test site(3) South Syracuse.

- 1) The transmission is limited to the direction of 80-170 degrees referenced to true north.
- 2) Notch out +/- 5MHz from 1320, 1340, 1257.41 1262.59 1341.41 1346.59 MHz

The testing will be applied for proposals to replace and upgrade technology into existing TPS-77, FPS-117 and TPS-59 DoD radars.
