Jim,

I contacted our site personnel and advised them to supply us with a listing of any new contracts they were operating on. These would be contracts that are the same as the original contracts the authorizations were issued under. These contracts, the new ones, have been issued based on the development under the original assignments granted to LMC. We were under the assumption that any contract changes and additions could be handled at the time of renewal, but based on recently raised allegations we felt it best to advise and correct the authorizations in question, as soon as possible. The site has prepared a Excel spreadsheet reflecting the authorizations, file numbers affected by the attached request.

If you feel these changes require any additional data please contact myself for any administrative input required. If you feel technical data is required contact Brian Budwey, PH (315)456-2051, or brian.k.budwey@lmco.com .

<<FCC Contact Numbers versus Licenses.xls>>

Please be advised in the future any contract changes or additional related to assigned authorizations will be handled at the time of noted changes.

Claude E. Wells
