

FCC Exhibit 3, Application Form 442, item 7: Government Contract.

Agency: Sensitive

Contract Number: Sensitive Information

Program Description:

The Low Frequency Bi-static Radar (LFBR) Demonstration Program is a series of unclassified radar data collects in support of a classified program for a US Government customer. These data will be used to investigate the physics of low frequency radar returns in a bi-static radar configuration. We are building a transmit capability to install in a company owned aircraft to serve as the illuminator for these bi-static radar experiments.
