Subject: FCC File No. 0195-EX-ST-2014

---

Message:

In response to correspondence concerning STA File No. 0195-EX-ST-2014 (Reference Number 23172), received from Mr. Behnam Ghaffari on March 6, 2014, Lockheed Martin has today submitted an update to its pending STA application. The update makes two revisions, as follows:

(a) Limiting the request to a single transmitter type from the original application (L3 Communications Model T-714); and

(b) Clarifying that the applicant seeks authority for two distinct phases of operation - (1) Commencing May 1, 2014 until launch for fixed (FX) use & (2) Commencing no earlier than August 13, 2014 for mobile (MO) use in connection with launch operations, which will continue from commencement for a period of ten (10) days.

Trajectory information, which was requested separately at a later date, is expected to be transmitted directly to NTIA, as other launch STA applicants have done.

Please let us know if there are any additional questions regarding this STA request.

Respectfully submitted,  
David Keir  
Counsel to Lockheed Martin
