RE: FAA Eastern Regional

Coordination need for MTM

Charlie / Don,

We need FAA coordination for the 9170MHz frequency of the MTM radar. The system parameters are attached to this message. The FCC has requested we re-coordinate the use of this frequency. This system is a mobile radar which is operated in Syracuse for demonstration to out potential customer. Please see attached parameters and reply with any questions or if additional information is needed. Per instructions, we are sending this requested to the FAA Eastern Regional office for prior coordination.

Thanks

D.J. Jardine
