

Exhibit B

1090MHz Antenna Information

A commercial-off-the-shelf (COTS) 1090MHz SSR transponder BEEL Tech Model# AE301367-1A is supplied with a Beel Technologies Inc TA-1030SP directional panel antenna. This antenna is located in a fixed location oriented horizontally and pointing at the 1030MHz SSR.

Operation of SSR and Transponder is proposed for the purpose of researching maximum capabilities, and demonstration performance of the secondary surveillance radar when integrated into a TPS-79 primary radar antenna.
