RE: Request for Coordination – Experimental license

Dear Mr. Cramer,

APCO-AFC has received your notice requesting coordination of a proposed experimental license for the 4.9 GHz band dated November 1, 2004. As APCO-AFC has no formal coordination responsibility for the 4.9 MHz band I must assume the action required by the FCC to obtain coordination would amount to notification to ensure any localized incumbent use of this band is protected. APCO-AFC will notify the appropriate parties in the local areas of proposed operation. Additionally, we will supply your contact information to those local entities to ensure the ability to contact you should any current use of the 4.9 MHz public safety allocation result in interference.

Thank you for seeking our input on this important matter. APCO looks forward to the developments in the 4.9 GHz band for the betterment of public safety. Please feel free to contact me for any reason.

Sincerely,

Ron Haraseth, Director
