

Contract Number and Program Description

The Affordable Phased Array Sub System (APASS) project is an Army Project funded out of AMRDEC Huntsville. The intention of this program is to develop a scalable low cost Phased Array Radar operating at 34 to 36 GHz. It is intended for a number of Air, Missile and Ground applications, and intends to demonstrate an operational radar system.

Army contract W31P4Q-08-D-0022, KaBand AESA, Task Order 0006
