The latitude below is correct – if you can make the change that will be great.

Thanks,
Giselle

Ben,

In reply to the email below the Stop Buzzer POC is Keith Massie – phone number 817-320-0468.

The Lat/Long provided in the application Latitude 32 42' 59.51", Longitude: -97 2' 1.76" seems correct to us and is consistent with data provided in other FCC applications for the location.

Please let me know if you need anything further.

Giselle
