

Exhibit A

A new license is requested for two additional IFF interrogator radars delivered to overseas customers under contracts:

Romanian Ministry of Defense, MoD contract #02/740/2007
Morocco Contract number #AHM/FRA/2007

Two Thales IFF Models TSA3521 and TSA3525 are Commercial-Of-The-Shelf (COTS) secondary surveillance radar interrogators, packaged as any one unit per TPS59 primary radar platform delivered. The TPS79 radar operates on current FCC license KA2XBN.

The following FAA coordination was obtained through the Eastern Regional office with parameters supplied in Exhibit B:

FREQ M1030, NG T090409 and NG T090410.

The customer is requesting different IFF radars for 20 foreign sites. Local operation is requested for production test and evaluation prior to overseas delivery.

These IFF radars are not for domestic air traffic control or USA sales.
