June 6, 2006

Federal Communications Commission  
Office of Engineering & Technology  
Washington, DC

We, the Lockheed Martin Corporation, are requesting a new Experimental Authorization for operations at our facilities located at Edwards Air Force Base, near Palmdale, Los Angeles County, CA.

This authorization is for operations exactly in nature as was recently granted for our operations located at Dobbins Air Force Base in Marietta, GA. These operations are for the demonstration and testing of electronics systems being integrated into the newest version of the C-5 for the US DoD and allied sales overseas.

The following is the request placed with me for this new authorization:

**Now we need ... another two-year experimental license for this same program activity to be conducted at EAFB, beginning 1 October 2006. All program details at EAFB will duplicate the Marietta operations with changes for beginning date (1 October 2006) and location (EAFB, CA, 34-54-20 N, 117-53-02 W).**

**Please submit application to FCC & AFTRCC.**

**Bob Thompson 770-494-2893**

Aftrcc coordination will be forth coming relating to this application.

Very Truly Yours,

Claude E. Wells
