

Government Contract Information

A 24 month renewal of KA2XBN is requested for the TPS-79 Primary Surveillance Radar (PSR) and a Thales TSA3521 Secondary Surveillance Radar (SSR) transmitting from the same integrated TPS-79 radar antenna.

The TPS-79 PSR and SSR IFF integrated radar is proposed to operate in existing test facilities for demonstration and supporting the following US government and foreign contracts:

02/740/2007
12/AHM/FRA/2007
12/AHM/FRA/2008
010402

Support includes the repair of spare parts, troubleshooting of any phenomenon experienced in foreign fielded systems, training (operational and maintenance), obsolescence engineering, testing of re-manufactured spare parts, product line improvements for manufacturability, or improving quality of operation or reliability, including NTIA and ITU spectrum testing.
