Message:

I have mde suggested changes to the testing locations from the program and I have also chnaged the proposed start date. They are request 20 June for 6 months I am trying to convince them later that week, I have not heard back from them about this suggestion, I think they would be willing to change to later that week to permit the processing ofthe application. I am also having them coordinate with AFTRCC and with the long weekend I probably will not get anything until later next week. And I will add that coordiantion when it arrives.
