Lockheed Martin

Re: **EXPERIMENTAL AUTHORIZATION**
Consent to Use of BRS Stations WNTB576, WNTB962 and WNTB262

Dear Mr. Spahic:

NSAC, LLC. ("NSAC"), a wholly-owned subsidiary of Clearwire Corporation is the licensee of BRS Stations WNTB576, WNTB962 and WNTB262. Lockheed Martin Corporation ("Lockheed Martin") has requested the temporary use of NSAC's spectrum (002658.50000-002668.50000 MHz) (the "Spectrum") from September 1, 2009 through August 31, 2010.

Clearwire supports Lockheed Martin's proposed testing and is hereby giving its consent to Lockheed Martin's use of the Spectrum one year in association with an application for Experimental Authority to be filed with the Federal Communications Commission ("FCC").

By its signature below, Clearwire hereby consents to Lockheed Martin's use of the Spectrum for the period specified above to demonstrate the capabilities of 4G wireless broadband services to the Federal Government.

Lockheed Martin agrees to operate on the Spectrum in accordance with the rules and regulations of the Federal Communications Commission, and to take all necessary steps to cause no interference to any current operations and to protect and preserve the status of the License associated with the Spectrum. There will be no commercial use of the spectrum pursuant to this experimental application. Without limiting the foregoing, Lockheed Martin agrees that in the event of interference, it will immediately cease any use of the Spectrum, until any interference issues that might arise are resolved to your satisfaction.

Clearwire believes that its consent to this trial will benefit it the 2.5 GHz band. The parties acknowledge that this letter will be attached to the application for Experimental Authority to be filed by Lockheed Martin with the FCC's Office of Engineering and Technology.
