

Exhibit A

Program Description

Requesting this STA to allow Lockheed Martin to demonstrate equipment to Air Forces Special Operations Command and other elements at Eglin AFB as part of the Battlefield Airman Summer Camp event. The equipment being developed will provide war fighters in the field high-bandwidth communications regardless of location. This technology also has potential to be used in support of first responders in homeland security applications and disaster-response events in the US.

This event is currently scheduled to run from approximately August 23rd 2010 to August 31st 2010.
