

Exhibit A

Antenna Data

- (a) Width of beam in degrees at the half-power point: Omni = 360deg/11dB & Directional = 88deg/18dBi in the azimuth plane
- (b) Orientation in horizontal plane: It is oriented such that the broadest beamwidth is parallel to horizontal plane or azimuth plane.
- (c) Orientation in vertical plane: It is oriented such that the broadest beamwidth is perpendicular to vertical plane or elevation plane.
