

Program Description

This work is being done under a US government contract with the Army expecting to deploy this equipment to US war-fighter in the theater of operation in the near term. The purpose of the testing proposed is to conduct environmental and qualification testing of a Non-Line Of Sight (NLOS) Container Launch Unit (CLU). The NLOS CLU is a portable missile launcher that is expected to be deployed to the US war-fighter after testing.

Projected start date is the 16th of November, 2009.
