RE: Lockheed Martin Corporation
File Number: 0400-EX-PL-2008
Frequency- 129.000 MHz

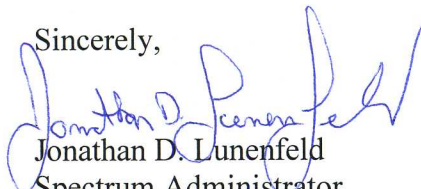

Dear Ms. Creeser:

ASRI has reviewed Lockheed Martin Corporation's experimental Special Temporary Authority pending under FCC file number 0400-EX-PL-2008. ASRI has determined that based on the parameters of the authorization, the potential for interference to our ground stations located within 100 miles is minimal.

In light of the above, ASRI acknowledges and has recorded Lockheed's technical information in our master database under control number 13194. Since Lockheed's operation is considered secondary to ASRI operations, be advised that if any interference does occur as on 129.000 MHz or adjacent channel operations 25 KHz apart from 129.000 MHz, all operations must immediately cease.

Your cooperation and attention to this matter is appreciated. Please feel free to contact me at 410-266-2132 or jdl@asri.aero if you have any questions. .

Sincerely,

Jonathan D. Lunenfeld
