

Project Description

Lockheed Martin proposes 24 month operation of one AN/UPX-41(C) Secondary Surveillance Radar(SSR). This aircraft interrogation radar uses a beacon antenna integrated on top of a Lockheed Martin built TPS-59 Primary Surveillance Radar (PSR) antenna platform. The TPS-59 radar is currently authorized separately under license WC2XRP.

This request is needed to verify requirements of US Marine Corps Contract number M67854-10-D-2200 and M67854-13-C-2436.
