

Contract Information

Lockheed Martin proposes operation of test signals with a Lockheed Martin PSTAR-ER antenna for radar receiver enhancement verification testing.

Lockheed Martin (LMCO) is under commercial contract #FA8650-10-C-1737 / (LM) 769-2 with Intelligent Automation Incorporated (IAI), for testing new PSTAR-ER receivers to be installed in transportable these mobile transportable radars in a fixed position while transmitting.

IAI/LMCO commercial contract fulfillment will benefit the Air Force Research Laboratory (AFRL) by showing results of such potential technology upgrades to transportable radar receivers.

In addition, Lockheed Martin proposes to use the test signals for development of new radar receiver technology upgrades with other potential suppliers.
