

Program Description

Description of testing: Verification of target missile system RF systems at Lockheed Martin integration facility located at 200 Lockheed Martin Way, Courtland, Alabama 35618. Testing is for non-flight operations prior to shipment from the facility. The target missile systems are provided to MDA under government contract HQ0006-04-D-0006. RF systems include S and L band vehicle telemetry, UHF flight termination systems, GPS, and C-band tracking beacon. During a typical 3 to 6 month integration and test sequence, RF testing occurs during a limited subset of the operations. RF testing would be on the order of 5 to 10 days with expected duration of about 4 hours for each test.
