Subject: FCC File No. 0517-EX-ST-2015

---

Message:

The STA was initially requested to allow system integration lab (SIL) ground testing to be performed prior to aircraft flight testing. Initial expectations were that lab tests would be complete or shifted to operations under a DOD (NTIA) radio frequency authorization (RFA) prior to expiration of the initial STA period, however, the RFA is now expected to be granted in mid to late 3rd quarter of 2015. Extension of this STA is requested to allow critical SIL testing of the radar to continue until the RFA is granted.
