

Project Description

Lockheed Martin Corporation (LMC) requests a license to operate a UPX-44AX Secondary Surveillance Radar (SSR) integrated into the TPS-79 Primary Surveillance Radar (PSR) platform for 24 months. The purpose of the testing is to demonstrate capability for domestic military clients in accordance with dRFP FA8730-11-R-0012. LMC anticipates intermittent operation in several hour intervals over typical working days, with occasional 24 hour operation including some weekends.

The TPS-79 PSR is currently authorized separately per KA2XBN FCC file number 0004-EX-ML-2011.
