

FAA Coordination

The UPX-44AX Secondary Surveillance Radar (SSR) was coordinated with the FAA Eastern Regional Office for 24 months:

FREQ M1030, SER#NG T120343

Operations on 1030 MHz should be in accordance with the following restrictions unless stated otherwise:

- a) PRR = 50 (Mode S)/164 (all other modes) pps
- b) Pulse Duration = FX 0.8 usec
- c) Only modes 1,2,3A, C and S are allowed to transmit
- d) Blanking is required in azimuth direction 316-225 degrees referenced to true north
