

Exhibit A

The following describes the need and purpose of the proposed experimental program.

These systems are being developed, designed and tested under an existing contract for the United States Navy to meet the increased need for National Security and protection of the borders of the United States.

This request is to facilitate a contract to provide antennas and below deck systems for the US Navy

Prime contractor: LMC MS2 Syracuse

Contract Number: (4) NXXXX-05-C-6204

Program Name: BLQ10 ESM

Program Type: Early warning system for US Navy Submarines

Test required: Direction finding accuracy test for the passive receive antenna

Initial Contract date for completion of 1st system: 3/2/2007

Final Contract date for completion of the last system: 2/1/2008

Required need date to meet contract date: 12/14/06

Deployment needs: System is provided to multiple versions of submarines for multiple classified missions

License duration request: 2 years
