Re: Request for Expedited Processing

We, the Lockheed Martin Corporation, respectfully request expedited processing for the attached Experimental Authorization applications. These systems are for GPS Re-Radiation testing and evaluation of systems critical for contracts currently held by Lockheed Martin Corporation. These contracts are for improving the reliability and accuracy of new weapons launch systems being utilized by the DoD in support of troops currently engaged in the conflicts in the Middle East.

These tests will be conducted in buildings located at Lockheed Martin Corporations facilities in Texas and Arkansas. Each of these systems are currently under government contracts for development, testing and demonstration prior to deployment to active combat zones. You will find all of the required technical and administrative data required for processing in the applications and exhibits for each location.

We, the Lockheed Martin Corporation, want to thank you in advance for your support and assistance in the processing of these applications. If you should have any problems or questions relating to these applications please feel free to contact the referenced personnel in the applications or myself at 410-682-2156.

Sincerely Yours,

Claude E. Wells
Computer Network Engineer
