

Due to the previous testing under the STA related to the following. The requested testing is in support of verification testing of Desert Hawk III UAV system prior to shipment to the UK MOD for deployment in theater. Testing includes operation of the autopilot, communications system and payload interfaces. Customer units returned for repair and evaluation will also be assessed and verified under this testing.

We, Lockheed Martin Corporation, request a start date of 12/02/2013 to continue further testing and development of these systems to support our efforts under contract to support the UK and our troops in Iraq and Afghanistan.
