November 22, 1996

To: Doug Jones
From: Claude E. Wells
Subject: Special Temporary Authorization Request

You will please find attached a copy of the STA request being mailed this date for a temporary operation to be conducted at Fort Hood, TX. The original dates given shown on the letter were November 20th to December 21st, 1996. As they delayed sending the fees for the requests I am not sure as to the correct dates so any help in processing this as soon as possible would be appreciated.

We are also filing a regular Experimental Request at this time for this program they insisted that I place the 20 year statement on the application, but as we know that is at least ten renewals down the road. Please call me if you have any problems with the application information and call Keith Wentworth, see item 20, for program questions. They are to have filed their request with INMARSAT for commissioning on the requested frequencies. Which should read 1626.5 to 1645.0, because the unit cannot go to 1660.

Thankk you in advance for any assistance you can provide. I will be out of the office on Monday, as my son is scheduled for surgery, but I will be in the office on Tuesday.
