Re: Frequency Liaison Office

You will please find enclosed one completed copy of FCC Form 442, application for a New Experimental Radio Station Authorization Under Part 5 - Other Than Broadcast, with the required FCC license processing fee, \$45.00, attached. This request is for a new radio system to operate in the frequency band 824 to 896 Mhz in the vicinity of our facilities located near Owego, Tioga County, NY.

The site personnel have contacted the local carriers using this frequency band and have obtained clearance to use the system on a none interference basis. And the system is utilizing a directional antenna to avoid any potential interference to outside systems. If you have any technical questions, please feel free to contact Claude Caci on (607) 751-5127. Any questions regarding the completion of the application, please feel free to contact the undersigned on (410) 682-0156.

Very Truly Yours,

Claude E. Wells
