

Privacy Request

FCC
Washington, DC

Gentlemen,

Pursuant to 47 CFR 0.459 (a), the Lockheed Martin Corporation hereby requests that Exhibits 1 & 2 be held in confidence, and not made available for routine inspection. This request is made of the Commission, because details of our internal research efforts are proprietary to Lockheed Martin. We are expending considerable funds to advance our technology efforts. We feel that inadvertent disclosure of this information to our competitors, would immediately signal them as to our long term technology direction. This could (and would) place us in a serious competitive and technical disadvantage. It is for this reason this request is being made.
