

10 August 2005

Mr. John Kennedy

In reference to STA File number 0473-EX-ST-2005, Confirmation number EL646429. The original correspondence dated 04 July 2005 identified the following as the complete list of all Satellite providers for the experimental period.

Satellite	Location
IntelSAT IS707	307° E
IntelSAT IA5	97° W
IntelSAT IA6	93° W
IntelSAT IA7	129° W
PanAmSAT Horizons 1	127° W
SES Americom AMC9	83° W

The coverage is for CONUS & Mexico. For additional information please see the following URLs

http://www.intelsat.com/resources/coveragemaps/sat_foot.aspx?name=IA-6&loc=93&spot=ku

<http://www.ses-amicom.com/satellites/amc-9.html>

These satellites use a earth narrow beam (spot) antenna

In response to your recent correspondence for application 0186-EX-PL2005 reference number 3808, effective today, 10 August 2005 LM is also reducing the number of potential satellite providers for this STA. The list of Satellite providers for the experimental period is the following:

Satellite	Location	
SES Americom AMC9	83° W	Preferred
IntelSAT IA6	93° W	Maybe used 1 Oct 2005 forward
IntelSAT IA7	129° W	Maybe used 1 Oct 2005 forward

The coverage is for CONUS & Mexico. For additional information please see the following URLs

http://www.intelsat.com/resources/coveragemaps/sat_foot.aspx?name=IA-6&loc=93&spot=ku

<http://www.ses-amicom.com/satellites/amc-9.html>

These satellites use a earth narrow beam (spot) antenna

The preferred Satellite is SES Americom AMC9 that has an immediate use through 30 September 2005. From 1 Oct 2005 onward any of the three may be used, based on Satellite providers. The preference will continue to be SES Americom AMC9

Please advise the next course of action if any.

Sincerely
Ed Mitchell
